<table>
<tr><th>THINKS & FEELS</th><th>HEARS</th><th>SEES</th></tr>
<tr><td>• Incident records require consistent and accurate data entry.
• Incomplete, inconsistent, or incorrect data can impact reporting accuracy, SLA compliance, and overall service quality.
• Incidents should contain complete and valid information.</td><td>• Defined business rules must be met before Incident records are submitted.
• Assigned To is mandatory for High impact incidents.
• State cannot be updated using list editing. Please open the Incident.</td><td>• Incident forms with Impact, Urgency, Assigned To, Assignment group, and State fields.
• UI Policies control field behavior when conditions are met.
• Error messages and alerts appear when configured rules are triggered.</td></tr>
<tr><td>PROJECT / USER

Incident record user

ServiceNow Incident form</td><td colspan="2">SAYS & DOES

• Sets Impact to High.
• Selects a user in the Assigned To field.
• Attempts to submit an Incident record.
• Attempts to edit the State field directly in the list or through the Incident form.</td></tr>
<tr><th colspan="2">PAINS</th><th>GAINS</th></tr>
</table>

• Incomplete, inconsistent, or incorrect data being submitted. • Reporting accuracy and SLA compliance can be impacted. • Manual checks and user awareness alone may not ensure data quality. • Record submission is prevented when required conditions are not met.	• Complete and valid Incident information. • Improved data quality and consistency across the platform. • Automated field behavior and save-time validation. • Clean and consistent data, improved form usability, and data integrity.
