Project Design Phase
Problem – Solution Fit Template

Date	13 October 2026
Team ID	6ab4a5100fc666a751b4361b
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

■ Solve complex problems in a way that fits the state of your customers.

■ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.

■ Sharpen your communication and marketing strategy with the right triggers and messaging.

■ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.

■ **Understand the existing situation in order to improve it for your target group.**

Template:

<table>
<tr>
<td>1. CUSTOMER SEGMENT(S)

ServiceNow administrators/configurators and users who create or update Incident records.</td>
<td>6. CUSTOMER CONSTRAINTS

Manual checks can lead to incomplete, inconsistent, or incorrect data. Users may submit Incidents without required information.</td>
<td>5. AVAILABLE SOLUTIONS

UI Policies and Client Scripts to control field behavior and validate Incident records at the user interface.</td>
</tr>
<tr>
<td>2. JOBS-TO-BE-DONE / PROBLEMS

Create complete, valid Incident records; apply conditional field behavior; prevent invalid submissions and unauthorized State list edits.</td>
<td>9. PROBLEM ROOT CAUSE

Reliance on user awareness and manual checks rather than standardized UI-level controls and validation.</td>
<td>7. BEHAVIOUR

When Impact is High, Assignment group is mandatory, Urgency is read-only, Urgency is set to High, and Assigned To is validated before save.</td>
</tr>
<tr>
<td>3. TRIGGERS

Changing Impact to High; submitting an Incident; editing State directly from the Incident list.

4. EMOTIONS: BEFORE / AFTER

Before: incomplete entries. After: clearer fields and consistent Incident data.</td>
<td>10. YOUR SOLUTION

Configure the High Impact Control UI Policy and onChange, onSubmit, and onCellEdit Client Scripts for Incident records.</td>
<td>8. CHANNELS OF BEHAVIOUR

Incident form fields, UI Policy Actions, Client Scripts, save/submit validation, and Incident list editing.</td>
</tr>
</table>
