Project Design Phase

Proposed SolutionTemplate

Date	13 October 2026
Team ID	6ab4a5100fc666a751b4361b
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	2 Marks

Proposed Solution Template:

Projectteamshallfillthefollowinginformation in the proposed solution template.

S.No.	Parameter	Description
1.	**Problem Statement (Problem to be solved)**	Incident records often require consistent and accurate data entry to ensure effective triage, routing, and resolution. However, relying solely on user awareness and manual checks can lead to incomplete, inconsistent, or incorrect data being submitted. This can impact reporting accuracy, SLA compliance, and overall service quality. To address this challenge, there is a need to enforce conditional field behavior and validation directly at the user interface level.
2.	**Idea / Solution description**	The objective of the Implement Client Script & UI Policy (Incident) project is to demonstrate how ServiceNow client-side controls can be used to enforce data integrity on Incident records. This implementation showcases how UI Policies and Client Scripts can dynamically make fields mandatory, auto-populate values, control field behavior, and prevent record submission when required conditions are not met. The solution ensures that Incidents are created with complete and valid information, improving data quality and consistency across the platform.
3.	**Novelty / Uniqueness**	UI Policies and Client Scripts work together to enforce dynamic field behavior, automate updates, and prevent incorrect data submission on Incident forms. The project uses onChange, onSubmit, and onCellEdit scripts alongside UI Policy actions.
4.	**Social Impact / Customer Satisfaction**	The solution improves data quality and consistency across the platform and supports effective triage, routing, and resolution. It helps maintain reporting accuracy, SLA compliance, and overall service quality.
5.	**Business Model (Revenue Model)**	Not specified in the project document.
6.	**Scalability of the Solution**	The solution remains lightweight, efficient, and easy to implement, making it ideal for short-duration micro projects while showcasing practical best practices for improving form usability and data integrity in ServiceNow.
